

## **Psychology Standards**

### **CCO 1: Psychology as Science, Philosophy and Theory**

#### **Questions 1 – 17**

Students will distinguish between different theoretical approaches that underlie explanations of behavior, and the contemporary research methods used by psychologists.

### **CCO 2: Relationship Between Biology and Behavior**

#### **Questions 18 – 32**

Students will analyze and draw conclusions about the relationship between biology and behavior as the key to the biological base of psychology.

### **CCO 3: Types of Learning**

#### **Questions 47 – 59**

Students will differentiate between the different types of learning.

### **CCO 4: Levels of Consciousness**

#### **Questions 33 – 46**

Students will determine different levels of consciousness.

### **CCO 5: Personality Theories**

#### **Questions 71 – 85**

Students will differentiate between the various personality theories.

### **CCO 6: Testing**

#### **Questions 60 – 70**

Students will analyze and draw conclusions about the development and uses of standardized testing.

### **CCO 7: Psychological Disorders and Treatment**

#### **Questions 86 – 100**

Students will assess various psychological disorders and their treatments.
